

NEW PRODUCTS GUITAR

GK-3 PICKUP
INCLUDED IN THE BOX

GR-20

Guitar Synth

Available: Now **RRP:** £399

Want to thicken up your guitar sound with a warm synth pad? Or how about a screaming lead sound that puts you in front? The GR-20 Guitar Synthesizer makes playing high-quality synthesizer and instrument sounds from your guitar as simple as 1-2-3. First, attach the included GK-3 Divided Pickup to your steel-stringed electric (no drilling necessary). Second, select the type of sound you want using the bank knob. Third, choose a sound variation using the number/value dial and start playing. Now it's easy to tap into the power of guitar synthesis.

THE LOWDOWN: SELECTED SPEC

- Complete guitar synthesis system with GK-3 divided pickup and GK cable
- Easy to use—select a sound category (strings, organ, synth, etc) and play
- Quick editing via attack, release, chorus and delay/reverb knobs
- Digital pitch detection for lightning-fast tracking
- Includes Roland's latest sounds—like sax, strings, flute, brass, bass and percussion loops
- GK-3 mounts easily on any steel-stringed electric without damage to guitar
- GK-3 features an adjustable curve design and pickup cable length, plus an attachment plate for Les Paul-type guitars
- Patch link enables system to work with MIDI-capable multi-effects like the GT-6

GK-3 Divided Pickup

The GK-3 divided pickup sits on your guitar (no drilling required) and sends individual signals from each guitar string to GK compatible devices; GK guitar synths, amps or the GR-20 MIDI to guitar interface, allowing access to the sounds of any sound module.

Slimmer and smaller than the original, a smooth rotary dial controls the volume, while a switch allows you to mix the levels between the synth sound and the guitar tone.

THE LOWDOWN: SELECTED SPEC

- Adjustable pickup cable length
- 1/4 inch phono jack for normal guitar input
- New Adjustable Curve Design. Adjust the curvature of the pickup unit to the curvature of the guitar strings
- Digital pitch detection for lightning-fast tracking
- Access Roland's latest sounds like sax, strings, flute, brass, bass and percussion loops
- GK-3 mounts easily on any steel-stringed electric without damage to guitar
- GK-3 features an adjustable curve design and pickup cable length, plus an attachment plate for Les Paul-type guitars
